Comment. The information in this report, especially that contained in paragraphs 2 and 3, confirms the 288th Gds Mtz Rifle Regt in the east section, and the 199th Gds Gun Arty Regt of the 94th Gds Mtz Rifle Div in the west section of the Flak Kaserne until 6 February 1953. See The howitzers are fairly definitely belong to the gun artillery regiment which has a third battalion equipped with 12 x 122-mm field howitzers. Source of paragraphs 2 and 3 also mentioned the howitzers in the reference report. It is possible that the howitzers as a large number of vehicle were not in use during the training at home stations and respreased only after the beginning of field training.

SECRET
